SIM OVERVIEW IMPLEMENTATION PLAN

FEBRUARY 10, 2016

# DISCUSSION TOPICS

What is SIM?

Benefits to Participating in SIM

Alternative Payment Model Framework

Why Behavioral Health Integration?

The Role of Telehealth in Integrated Care

How to Get Involved

**SIM**

State Innovation Model

# What is SIM?

Colorado SIM is a cooperative agreement between the federal Centers for Medicare and Medicaid Innovation (CMMI) and the state of Colorado. Many states participate in SIM. Colorado won a \$65 million SIM award to integrate primary and behavioral healthcare and reform healthcare reimbursement structure in the state.

# What are SIM's Goals?

SIM's overall goal is to increase access integrated and comprehensive behavioral and primary care services to 80% of Coloradans by 2019. This goal is to be achieved through the SIM Triple Aim.

## THE TRIPLE AIM

**Better Experience of Care:**  
Access to integrated care for 80% of Coloradans and improvement in 15 clinical quality measures

**Lower Costs:**  
By increasing access to integrated care to 80% of Coloradans, SIM will save Colorado a projected \$126.6 million in cost of care by 2019 and \$85 million in annual savings thereafter

**Improved Population Health:**  
Projected improvements in 12 areas of physical and behavioral health

## How will SIM accomplish its goals?

SIM will accomplish its goals by focusing on four key efforts

Payment Reform

Practice Transformation

Population Health

Health Information Technology

# HEALTH TRANSFORMATION IN COLORADO

**SIM**  
State Innovation Model

Payment Reform

Practice Transformation

Population Health

Consumer Engagement

HIT

Workforce

Policy

Evaluation

- Payment Reform:
  - SIM will implement value based payment models that incent integration and improve quality of care by:
    - Engaging and garnering commitments from public, private, and self-funded payers.
    - Facilitating a coordinated movement toward value based payment models and away from fee-for-service payment models.
    - Creating a common set of measures for value based payments.
    - Providing technical assistance, business consulting, and additional training to 400 practices and four community mental health centers (CMHCs) to promote advancement along a continuum of integrated care.

# MEMORANDUM OF UNDERSTANDING

# PAYMENT REFORM

## OBSERVATION PHASE

- *Identify current & future spending benchmarks*
- *Understand needs to transform practice, delivery & payment*
- *Identify outcome & quality baselines*

## SHARED RISK & SAVINGS

- *Increased provider responsibility*
- *Extra payment built into cost of care*
- *Support in practice transformation*
- *Performance, cost & quality measurement*

## CARE COORDINATION & SAVINGS

- *Increased coordination thru additional payments*
- *Support in practice transformation*
- *Performance, quality & cost measurement*

## PAYMENTS & BUDGETING FOR COMPREHENSIVE PRIMARY CARE

- *Learning collaborative*
- *Payment based on total cost of care & coordination*
- *Performance, quality & cost measurement*

- **Practice Transformation**

- Colorado SIM supports practices as they advance toward greater integration of physical and behavioral health care. Colorado SIM will:

- Provide 400 primary care practices with practice transformation support, including access to practice facilitators, Clinical Health Information Technology Advisors, business consultation services, technical assistance, learning collaboratives, and more.
    - Creation of a Bidirectional Health Home program, which supports four Community Mental Health Centers as they integrate primary care providers into their onsite services.
    - Disseminate competitive mini-grants to SIM-participating practices that need additional capital to further advance integration and innovation.
    - Work to ensure that the current and future workforce has training and capacity to support integrated care delivery models.
    - Coordinate and align the state's regulatory oversight structures and remove barriers to integrated care through in-depth policy analysis and recommendations.

# COLORADO SIM : WHY IT MATTERS

84%

Of the time, the 14 most common physical complaints have no identifiable organic cause

80%

Of people with a behavioral health disorder will visit primary care at least once a year

> 50%

Of referrals from primary care to an outpatient behavioral health clinic do not make the 1<sup>st</sup> appointment

50%

Of behavioral health disorders are treated in primary care

67%

Of people with a behavioral health disorder do not get behavioral health treatment

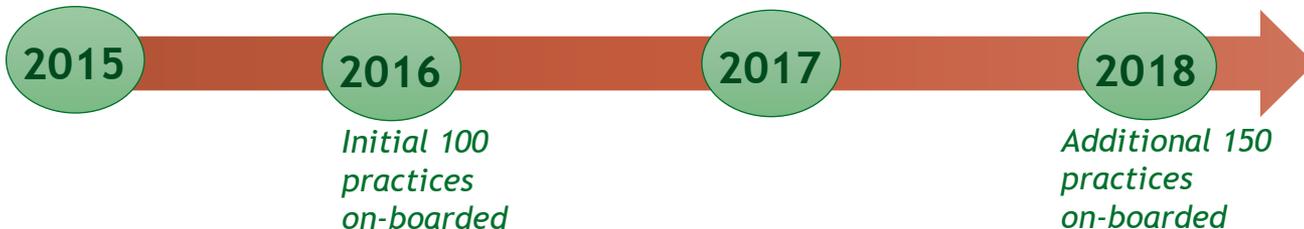

# PRACTICE TRANSFORMATION

- Integration of physical and behavioral health care in 400 practices over the four year grant period.
- Implementation, assessment and technical requirements for practices to move toward integrated care and new payment model implementation.
- Develop inventory of all practices and behavioral health providers in Colorado and what services are being provided.

*Ramp-up, including  
practice assessment tool  
& IT infrastructure*

*Additional  
150 practices  
on-boarded*

- **Population Health**

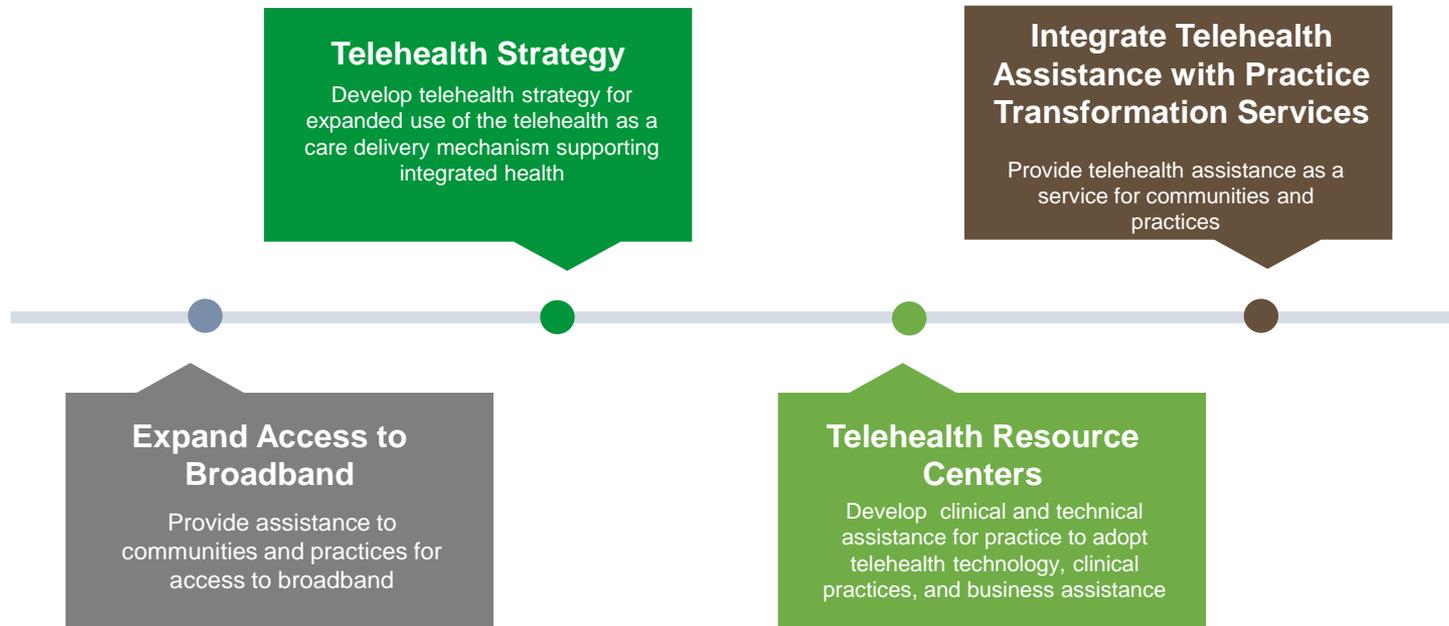

- Colorado SIM will support communities as they implement strategies that reduce stigma, promote prevention, and remove barriers to accessing integrated care. Colorado SIM will:

- Develop and disseminate educational opportunities and materials that focus on public health issues and special populations.
    - Disseminate competitive grants to Local Public Health Agencies and Regional Behavioral Health Collaboratives to support behavioral health prevention activities.
    - Oversee the SIM Extension Service, which will support a workforce of Regional Health Connectors who will connect practices with the local public health system and other community-based resources.
    - Monitor population health data and track trends in behavioral and physical health outcomes in order to identify areas of high burden and develop evidence-informed approaches to addressing needs.

## ▪ Health Information Technology

- The secure and efficient use of technology will be promoted and barriers to accessing care will be removed by:
  - Contribute to the development of the Shared Practice Learning and Improvement Tool (SPLIT) so practice transformation success can be assessed and measured.
  - Develop and implement a Clinical Quality Measures Reporting Tool (QMRT) for SIM participating practices to collect data on the clinical quality measures used for measuring practice transformation progress and SIM success analysis.
  - Acquire and integrate clinical, behavioral health, and payer data to facilitate analytical reporting on quality measures as well as cost utilization measures.
  - Expand access to broadband for at least 300 sites throughout the state, facilitating greater use of telehealth as a healthcare delivery modality.
  - Develop and implement a statewide Telehealth strategy, including significant stakeholder input.
  - Identify barriers around data sharing and clarify state and federal regulations around data sharing, privacy and confidentiality, and patient consent.
